

The Future of Expense Management for Modern Finance Teams

Modern infrastructure for automation, visibility, and policy-led control.

Simplifying Expense Control for 5000+ Businesses

Why Expense Management Still Drains Time

Today's finance teams juggle multiple tools, spreadsheets, and follow-ups just to close monthly books.

Employees upload receipts manually and chase approvals.

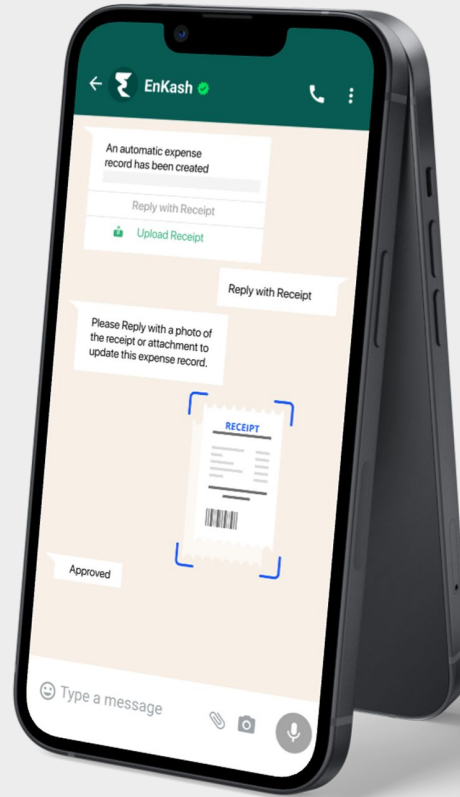

Managers lack visibility and spend days validating claims.

Finance teams reconcile data late, risking compliance gaps.

Introducing EnKash Expense Management

The complete platform to automate, control,
and optimize every business expense.

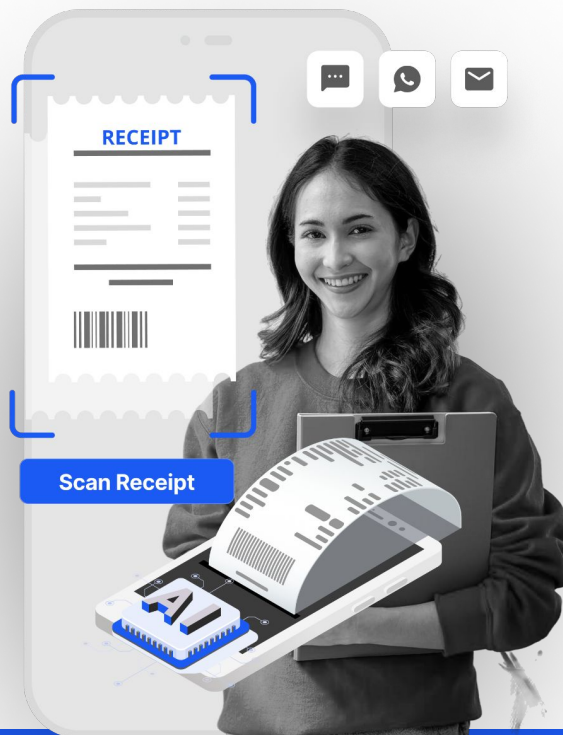

A Modern Platform for Modern Finance Teams

Today's finance teams juggle multiple tools, spreadsheets, and follow-ups just to close monthly books.

Capture Expenses from Anywhere. Instantly.

- Snap and send via email, expenses auto-created
- Forward receipts via email or upload through the app
- Every spend captured and tagged in real time

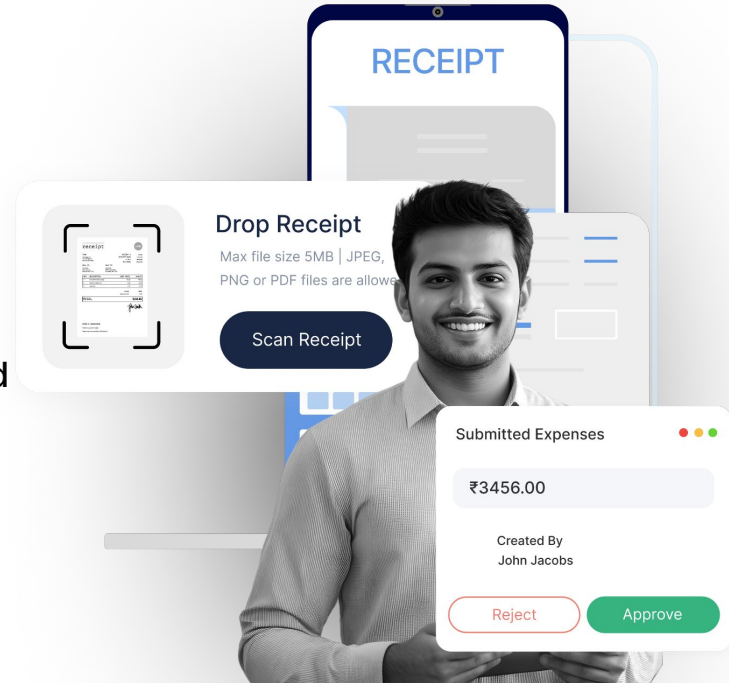

Create, Track & Submit Expenses. Now on WhatsApp.

- 🟢 Drop your receipt on WhatsApp, the system auto-reads every detail
- 🟢 AI-powered setup auto-fills merchant, date, and amount instantly
- 🟢 Review, edit, and submit directly from chat, no app login required
- 🟢 Works 24×7 with real-time sync to dashboards and ERP

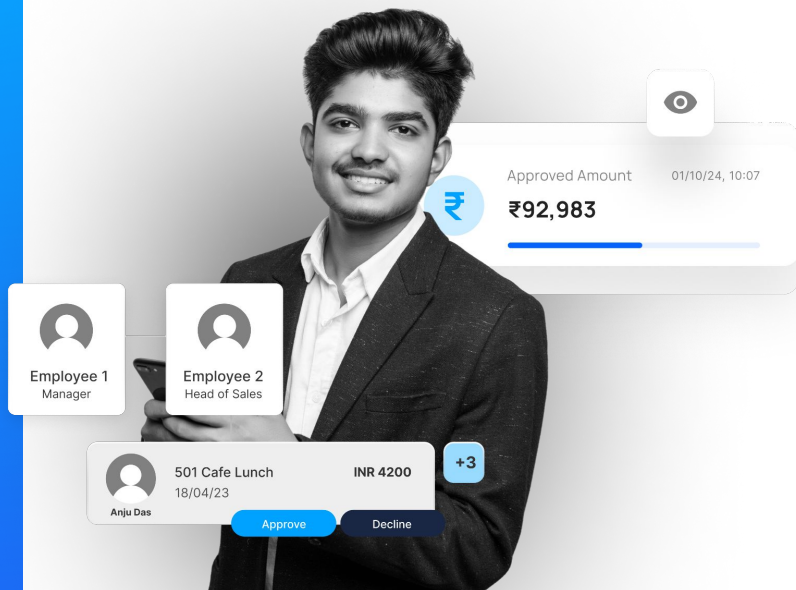

AI & OCR That Reads Every Receipt So You Don't Have To

- Auto-detects merchant, amount, date, category, and GSTIN
- Works with printed, handwritten, or digital receipts
- Pre-fills expense forms for faster submission and zero manual entry

Validate Every Expense Before **It Hits Finance**

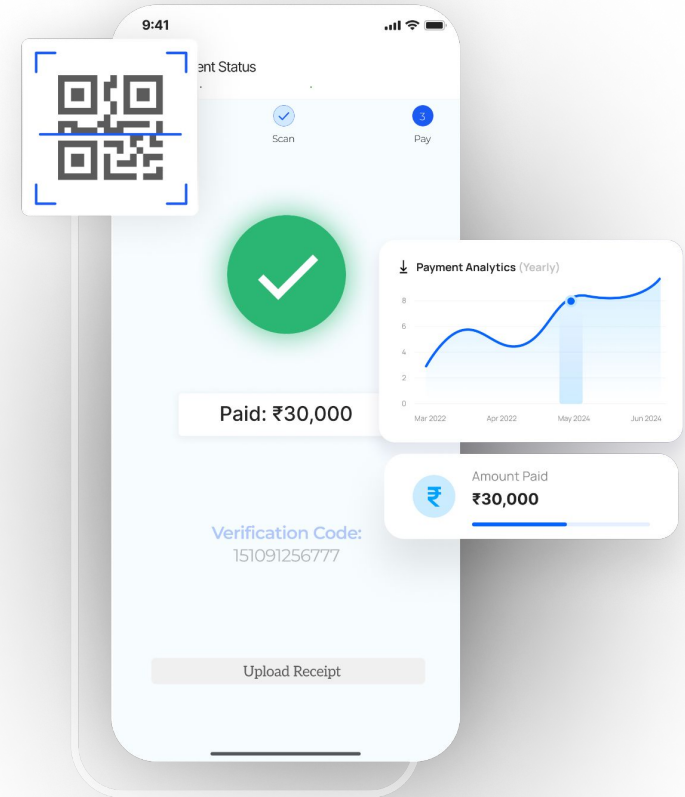

- Customizable limits by department, role, or category
- Multi-level approval routing and rule automation
- Auto-flagging of duplicates or out-of-policy claims
- Automated receipt reminders for missing proofs

Disburse Without **Delays, Errors,** **or Follow-Ups**

- Auto-credit approved claims to pre-set wallets.
- Category-wise wallets for travel, meals, or allowances.
- Funds available instantly via cards or UPI.
- Real-time tracking and audit trails for finance.

Automate Travel Requests, Per Diems & Approvals

- Smart travel request forms with pre-filled trip details
- Auto-calculated per diem by city and role
- Policy validation for limits, destinations, and dates
- Real-time budget visibility for finance and HR

The Smarter Way to Manage Petty Cash

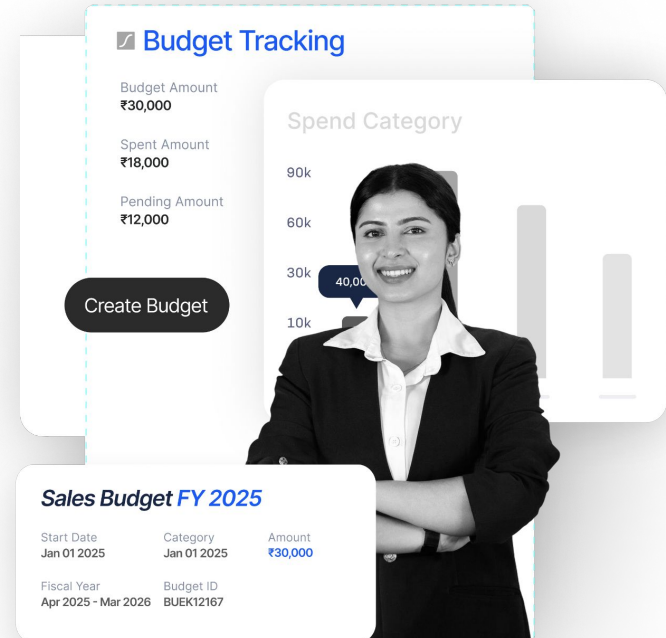

- UPI-based petty cash wallets for branches and teams
- Instant fund distribution and usage controls
- Auto-expense creation for every transaction
- Live dashboards and audit-ready logs
- Block merchants or categories, set spend caps

Track Every Rupee in Real Time

- Real-time tracking by department, project, or employee
- Budget vs Actual comparisons and instant alerts
- Predictive spend forecasts using AI
- Custom financial and compliance reports
